How to price your order:

1. Choose your t-shirts, sizes and quantities.
2. Multiply t-shirt qty x \$2.50 = base garment cost
3. Multiply front ink cost x t-shirt qty = front print cost
4. Multiply back ink cost x t-shirt qty = back print cost
5. Base garment cost + front and back print cost = Total order cost

(example: 50 shirts, 1 color front and 3 color back. 50 x \$2.50 = \$125.00 base garment cost. Front print cost \$1.45 (1 color) x 50 = \$72.50. Back print cost \$2.15 (3 color) x 50 = \$107.50. Totals: \$125.00+\$72.50+\$107.50 = \$305.00)
